

2024 Training Symposiums

Versaterm Professional Standards

In addition to delivering best-in-class software solutions, we provide ongoing support and training opportunities, ranging from the annual IAPRO Users Conference to specialized training symposiums and webinars.

The Training Symposiums are free two-day, onsite sessions that cover basic and advanced instruction of Versaterm's IAPRO and BlueTeam solutions. Additionally, the sessions provide opportunities for peer networking and sharing best practices.

Our elite group of trainers consists of current or former law enforcement professionals with years of service and experience within Professional Standards/Internal Affairs units, bringing valuable insight to each training session.

To learn more about the upcoming events, please visit the [registration portal](#).
